DECLARATION OF KARL H. CUNHA UNDER 37 C.F.R. 1.131

Sir:

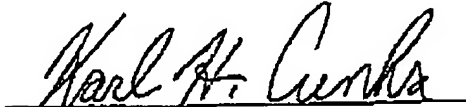

1. I, Karl H. Cunha, hereby declare as follows:
2. I am one of the inventors in U.S. Patent Application No. 10/817,311 filed April 2, 2004 for an array storage system having a removable backplane.
3. As I understand, the most recent Office Action asserts that my invention is unpatentable as being anticipated by U.S. Patent No. 6,906,914 to Stamos ("Stamos '914").
4. I have reviewed the disclosure of the Stamos '914 patent. It does not disclose positively fixing, such as by screwing or the like, the backplane to a supporting structure. Rather, its backplane is sandwiched between the front and back partitions by attachment of the back partition.

5. In this configuration, Stamos '914 discloses that the rear partition can be removed with the electrical components still in place. (see, for example, col. 4 lines 11-16).

6. During development of my invention I determined that positively fixing the backplane to a supporting structure is necessary to prevent damage to the electrical components when removing the back partition. With a loosely floating backplane, as disclosed by Stamos '914, the pulling force of a component on one side of the partition is likely resisted by another component's connection to the backplane on the opposing side of the backplane. I observed that this likely results in the loss of alignment between the components and the backplane such that the electrical components disconnect abruptly and with damage to their fragile electrical contacts.

7. I declare that all statements made herein that are of my own knowledge are true and that all statements that are made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. §1001 and that such willful false statements may jeopardize the validity of the above-applications or any patent issued thereon.

Karl H. Cunha
